

# BYOx Requirements

Years 10 - 12

Wavell State High School uses technology to empower, enhance and support learners for the future with our Bring Your Own Device (BYOx) program from Years 7 -12.

Laptops are required for all year levels with classroom use varying from day to day. This will depend on each individual lesson and how the device enhances the learning experience.

Laptops usually have an expected lifespan of 3 – 4 years, depending on the laptop build quality and individual usage and care. Families who have a device which is less than 4 years old are encouraged to bring it to school to check compatibility before having to purchase another device.

## Device Specifications

	Minimum	Further Information
PC	Windows 10 or Mac OS 11 (Big Sur) – or above	Not Supported: Chromebooks or tablets (including iPads)
Screen Size	13” – 15”	
RAM	8GB	Windows 10 uses significant RAM to run. Users with less than 8GB may notice issues with lagging when using multiple programs or internet tabs at once.
Processor	Intel Core i3 or higher, AMD Quad-core equivalent or higher	
Storage	120GB Solid State Drive (SSD)	Students will be using OneDrive, which is a cloud-based storage system.
Wireless	Standard (802.11ax/802.11ac/802.11n) 5.0GHz or Dual Band	
Additional	Senior students may benefit from a laptop with stylus capabilities when utilising OneNote in various subjects.	

**CAUTION:** These devices are not supported.

Chromebook laptops, Android tablets, iPads, or devices using Windows 10S, Windows RT or Linux.
